WORKS ON

phone, tablet or laptop

Thanks for helping us test the field-reporting side of our project platform. For the next three days, please use it the way a real civil subcontractor foreman would: at the end of each work "day," file one field report covering what your crew did, mark it on the site plan, and add photos. Our Construction Manager (Mark) will review and approve your work. We are hunting for anything confusing, broken, or slow. There are no wrong answers here - if something feels off, that is exactly what we want to know.

Before you start

Open `https://pm-platform-nine.vercel.app`

Email `sub-civil@ahc.test`

Password `SubCivil2026!`

Project Use Test Project - Cash Flow for everything.

On the sign-in screen, click **"Sign in with a password instead,"** then enter the email and password above. Please change the password after the test.

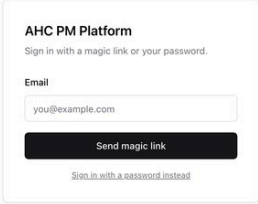

What you are testing: the daily loop

Every work day is one report. You describe the day, drop pins on the site plan for the work you did, attach photos, and submit. That is it. Here is the full walk-through - do it in order the first time.

1

Sign in

Go to the website, choose **Sign in with a password instead**, and log in with your email and password.

AHC PM Platform

Sign in with a magic link or your password.

Email

you@example.com

Send magic link

[Sign in with a password instead](#)

The sign-in screen. Use the password option, not the magic link.

2

Open the project and start a report

Open **Test Project - Cash Flow**, go to the **Field Reports** tab, and click **New Field Report** (top right).

- 3 Fill in the day details**
- Set the **report date**, **crew count**, and **hours per day** (total man-hours calculates itself). Add the **weather** and a short **work narrative** of what the crew accomplished.

Field Reports

← Field Reports

Daily Field Report
One report for the day: the progress narrative plus the work you did, marked on the site map. The Construction Manager reviews each pin the next day.

Day details

Report date
07/21/2026

Crew count
e.g. 8

Hours per day
e.g. 8

Total man-hours
0 (crew x hours/day)

Weather
e.g. Sunny 78F, light wind

Work narrative
Crew installed 320 LF of trench, ran AC wire pulls to inverter pad...

Work done - mark it on the map (0)
Tap the site plan wherever you worked today. Each pin becomes an item the Construction Manager reviews and approves.

Subcontractor filing this report

Day details. Man-hours fills in automatically from crew count times hours.

- 4 Say who is filing, then mark the work on the map**
- Under **Work done - mark it on the map**, pick **Civil** in the "Subcontractor filing this report" dropdown. Then **tap the site plan** wherever your crew worked - a pin drops. You can switch sheets (C1-01, C2-01, and so on) to mark work on a different plan.

- 5 Fill in the pin and attach a photo**
- Each pin is one piece of work tied to a schedule item. Pick the **WBS / schedule item**, a **status**, **% complete**, and the **installed quantity** with its unit (LF, EA, and so on). **Add at least one photo**, then click **Save pin**. A saved pin turns green and shows **Saved**.

C2.01 Site Improvement Plan. Each sheet keeps its own pins - switch sheets to log work on a different plan.

C2-01 · Pin 1 Remove

WBS / schedule item *
CIV-1.1 Civil earthwork - July

Status *
In Progress

% complete *
35

Installed qty *
250 LF

Notes (optional)

Photos * (1)
Add photos (tap to choose or take a picture)

demo_photo.jpg Done

Save pin

Filling in a pin: WBS item, status, % complete, installed quantity, a photo, then Save pin. All the starred fields are required.

- 6 (Optional) Log equipment, deliveries, delays, or safety**
- Below the map you can add **equipment on site**, **deliveries**, **delays**, and any **safety incident or near miss**. Skip these on day 1 if you want, but please exercise them by day 2.

7

Submit

Click **Submit Field Report**. Your report now shows **Submitted** and moves to Mark for review.

Field Reports

Field Reports

One daily report per sub: the progress narrative plus work marked on the site map. The Construction Manager reviews each pin.

New Field Report

DATE	SUBCONTRACTOR	REPORT	WORK PINS	SUBMITTED
Jul 21, 2026	Civil	Submitted	1 Submitted	Jul 21, 2026
Jul 20, 2026	Civil	Submitted	1 Submitted	Jul 21, 2026

After submitting, your report appears in the Field Reports list marked Submitted.

What happens next

Mark (the Construction Manager) reviews each pin, attaches his own verification photo, and either **approves** or **rejects** it. If he **rejects** a pin, it bounces back to you with a reason - fix it and re-submit. When he approves, your reported progress flows onto the project schedule. You do not need to do anything to trigger his review.

Your 3-day test plan

Aim for a few reports each day so we cover the normal loop plus the messy real-world cases. File reports on different dates (you can back-date the report date) so we can test how corrections behave.

DAY	WHAT TO DO	WHAT WE ARE CHECKING
Day 1 Jul 21	File one clean report end-to-end: day details, one pin with a photo, submit. Then check the Field Reports list shows it as Submitted.	The basic loop works and is easy to follow the first time without help.
Day 2 Jul 22	File a report with two or three pins on different parts of the plan. Add an equipment row, a delivery , and a delay . On one report, tick Near miss and write a safety note. Try editing a saved pin before submitting.	The extra sections work, editing a pin works, and safety flags are obvious.
Day 3 Jul 23	File a correction : report the same schedule item again on a later date with a lower % complete than before. Try marking work across two different sheets in one report. Re-submit anything Mark rejected.	Corrections and rejections flow back cleanly, and multi-sheet reports hold together.

Please try to break it

- Try to **submit without saving a pin**, or save a pin with a required field blank. Does it stop you clearly?
- Enter a **% complete over 100**, or a negative quantity. What happens?
- File **two reports for the same date**. Does it warn you?
- Drop a pin, then **Remove** it. Add several photos to one pin, then delete one.
- Do the whole thing **on your phone** - is anything too small, cut off, or hard to tap?
- Start a report, leave, and come back. Is your draft still there?

How to report anything you find

When something is confusing, broken, or just annoying, jot it down. The more detail the better. For each issue, note:

#	DATE / TIME	WHAT YOU WERE DOING	WHAT YOU EXPECTED	WHAT ACTUALLY HAPPENED	PHONE OR COMPUTER?
1					
2					
3					
4					
5					

A screenshot is worth a thousand words - on most phones, press the side + volume buttons; on a Mac, Shift+Cmd+4. Send your notes and screenshots to Phil at the end of each day.
